

BUSINESS START UPS

The starting of a new business is a very exciting time. Should you start as a Sole Trader/Partnership/Limited Company? We will explore the advantages and disadvantages of each structure and advise in conjunction with your Accountants and other advisers to provide the best start for your new business.

Is your finance properly organised? You will need Terms of Business and advice on Contracts of Employment. Should you lease or buy your business premises?

Are you satisfied with the finance package that is provided by your bank? We have extensive contacts with leading banks and will be happy to advise and refer to banks and Accountants where appropriate.

If you are to be a Sole Proprietor or in Partnership then personal liability must be considered in the event of the business not succeeding. Proper attention at the start of the enterprise should pay dividends later. We will help over the raising of finance for expansion and the ways in which this can be achieved.

We will form your limited company or restructure as you wish.

We will provide a package of services tailored to your individual needs both as to service and price.
